SUMMARY

Full-Stack Developer and Information Systems student with hands-on experience building web applications for safety, training, compliance, and IT operations. Work spans requirements analysis, Laravel-based development, relational databases, REST/API integration, workflow automation, document/report generation, troubleshooting, and production deployment. Comfortable working across frontend, backend, data, and application integration layers.

EXPERIENCE

PT Kayaba Indonesia - Full-Stack Developer Intern Jan 2026 - Present

- Develop internal and external applications with Laravel, Bootstrap, JavaScript, and MySQL, including multi-database integrations with company ERP and operational data.
- Analyze user requirements and existing business processes to define application flows, database structures, access roles, dashboards, reports, and technical specifications.
- Use Git/GitHub for version control and support deployed systems through testing, troubleshooting, bug fixes, and improvements based on user feedback.
- Work directly with end users and internal stakeholders to clarify requirements, validate workflows, and refine features during development.

IT Club, SMKN 12 Jakarta - Front-End Mentor Jan 2022 - Nov 2022

- Mentored junior students weekly in frontend development, covering HTML, CSS, responsive design, and translating interface designs into working pages.
- Guided students in using Bootstrap and Tailwind CSS while reinforcing practical coding and design-slicing fundamentals.

PROJECTS

Nourish - AI-Assisted Nutrition Tracker (Oct 2026) | *Next.js 16, TypeScript, Laravel 13, MySQL, Redis, Laravel AI SDK*

- Built a mobile-first nutrition tracker for meal logging, daily nutrition targets, weight history, Google sign-in, and editable AI-assisted meal-photo estimates.
- Implemented queued photo analysis through Laravel background jobs so users can review and edit structured meal and nutrient estimates before saving.
- Deployed the Next.js frontend on Vercel and Laravel API on an Ubuntu VPS with Nginx, HTTPS, Redis-backed queues, and a private AI gateway.

Work Permit Management System (Feb-Jun 2026) | *Laravel 12, MySQL, Bootstrap, FPDI/mPDF/QPDF*

- Replaced paper-based contractor permit-to-work and Job Safety Analysis workflows with staged reviews & approvals from end-users through management.
- Integrated company/ERP data, credential verification, notification routing, and a dynamic JSA workflow in a multi-database Laravel application.
- Generated, compressed, and bundled permits, JSA forms, and QR-signed documents into audit-ready PDF archives using FPDI, mPDF, and QPDF.

EHS Academy LMS (Jul-Aug 2026) | *Laravel 12, MySQL, Bootstrap, Laravel Excel*

- Digitized recurring EHS safety training into courses, modules, and learning materials with pre-tests, Kiken Yochi hazard-identification exercises, and post-tests.
- Tracked participant completion and supported certificate generation, training status monitoring, and exportable reporting for staff records.

Safety Compliance: Genba & Machine Information (Aug-Sep 2026) | *Laravel 12, MySQL, Bootstrap, PhpSpreadsheet*

- Digitized Genba inspections for machinery, safety devices, and production lines with schedules, findings, safety categories, and monitoring dashboards.
- Tracked the PICA lifecycle through PIC assignment, corrective-action follow-up, deadlines, status visibility, and QR-based approval workflows.

Software Audit & License Compliance (Sep 2026) | *Laravel 12, MySQL, Bootstrap, Lansweeper, Laravel Excel*

- Built an IT compliance platform that compares periodic Lansweeper inventory snapshots to identify added/removed software and device changes between sweeps.
- Added monitoring and reporting views for license status, ungrouped software, inventory changes, and audit follow-up.

EDUCATION

Politeknik STMI Jakarta | **Automotive Industry Information Systems** | Sep 2023 - Present | GPA 3.81 / 4.00

Activities: HEXA robotics community; NASA Space Apps, Garuda Hacks, MAXY Impact, hackathons and line-follower competitions.

TECHNICAL SKILLS

Languages & Frameworks: PHP, Laravel, CodeIgniter 4, JavaScript, TypeScript, Next.js, HTML, CSS, Bootstrap, Tailwind CSS
Data & Infrastructure: MySQL, SQLite, Firebase, Redis, Linux, Nginx, Vercel, Cloudflare
Integration & Analysis: REST APIs, Google OAuth, RBAC, Git/GitHub, UML, Flowcharts, MVC, SDLC, Bizagi / Draw.io

ADDITIONAL INFORMATION

1st Place - COKRO Line Follower Competition (2024) | **3rd Place** - Garuda Hacks 4.0, Youth Empowerment (2023)
TOEIC 945/990 (2022) | **KKNI Level II Software Engineering** - LSP Certificate of Competence (2023)
Speaker - "Improve Your Potential Skill 2.0" Seminar (2024)
Languages: Indonesian (Native), English (Proficient)
