

ALVARO MUYASSAR

FULL-STACK DEVELOPER INTERN

[+6281291008278](tel:+6281291008278) | linkedin.com/in/alvaromuyassar | github.com/muyassaralvaro | muyassaralvaro@gmail.com

SUMMARY

Junior Software Developer with a background in Automotive Industry Information Systems. Experienced in designing and optimizing web-based enterprise applications using PHP Frameworks like **Laravel**, **CodeIgniter**, and RDBMS such as **MySQL**. Skilled in database optimization, Third-party API integration, and implementing secure, role-based access control user managements.

EXPERIENCE

Full-Stack Developer Intern, PT. KAYABA INDONESIA

Jan 2026 - Now

- Developed enterprise-grade web-based internal and external applications using Laravel, Bootstrap, and MySQL, with a multi-database integration that links with company data that is stored in the company's ERP.
- Analyzed user requirements to define business, application, and technical specifications for system development.
- Managed version control and application integration using Git/Github.
- Conducted troubleshooting and bug fixing based on user feedback to enhance application efficiency and user experience.

Front-End Mentor, IT CLUB SMKN 12 Jakarta

Jan 2022 - Nov 2022

- Mentored junior students weekly in the IT Club, focusing on developing technical coding skills.
- Instructed junior students on frontend design principles and design slicing using HTML and CSS.
- Guided junior students in utilizing modern CSS frameworks, including Tailwind and Bootstrap.

PROJECTS

Work Permit Management System | PT. Kayaba Indonesia

Feb 2026 - Jun 2026

- Automated the end-to-end safety permit-to-work creation workflow by replacing legacy paper-based processes with a multi-tier approval system, streamlining compliance from department supervisors to executive leadership (Board of Directors).
- Designed a Laravel 12 multi-database solution to centralize ERP integration, featuring automated WhatsApp alert routing, credential verification, and a dynamic Job Safety Analysis (JSA) builder.
- Developed a server-side document processor using FPDF, mPDF, and QPDF to dynamically generate, compress, and bundle safety permits, JSA forms, and QR-coded signatures into audit-ready PDF archives.

EHS Academy: Learning Management System | PT. Kayaba Indonesia

July 2026 - August 2026

- Developed a centralized Learning Management System (LMS) to digitize EHS training procedures, including their yearly Basic Refreshment Training, for efficient course management and real-time monitoring.
- Built a structured training workflow featuring pre-tests, modules / materials, interactive hazard identification (Kiken Yochi) exercises, and post-tests to ensure effective evaluations.
- Streamlined the certification process with automated delivery upon completion, leveraging the company's existing Laravel 12, Bootstrap, and MySQL tech stack.

Safety Compliance Genba & Machine Information | PT. Kayaba Indonesia

August 2026 - Now

- Digitalized the manual Genba safety inspection process for machinery, safety devices, and production lines, replacing the legacy manual paper-based workflows with a centralized digital platform.
- Automated the end-to-end PICA (Problem Identification and Corrective Action) lifecycle, featuring real-time issue tracking, automated PIC assignment, deadline notifications, and QR-based digital approval workflows.
- Implemented a scalable inspection platform using Laravel, Bootstrap, and MySQL to optimize facility-wide compliance visibility and streamline corrective action workflows.

EDUCATION

Bachelor of Automotive Industry Information Systems, Politeknik STMI Jakarta

Sep 2023 - Now

- Active in Campus's Robotic Community called STMI Hardware Experiment (HEXA)
- Participated in competitions, such as Hackathons, Line Follower Tournaments, etc.
- Given the opportunity to be a commencement announcer on Campus's Graduation event.
- Maintained a consistent academic record with a 3.81 GPA.

SKILLS

- **Full Stack Development:** PHP (Code Igniter 4, Laravel), HTML, CSS (Bootstrap 5, Tailwind), Javascript.
- **UI/UX Design:** Design Slicing, Responsive Design.
- **DevOps & Version Control:** Git, Github
- **API Integration:** Third-Party API Integration
- **Design:** MVC Architecture, Flowcharting, ERD, UML, Bizagi, Draw.io
- **Software Development:** Agile Programming-like Workflow, SDLC
- **Problem Solving:** Troubleshooting, Debugging, User Feedback Handling
- **Database Management:** MySQL, Firebase., PostgreSQL, Oracle DB, SQLite, Firebase

HONORS & AWARDS

- **1st Place**, Line Follower COKRO Competition, 2024
- **3rd Place**, Youth Empowerment Category Garuda Hacks 4.0 Hackathon, 2023
- **Speaker**, "Improve Your Potential Skill 2.0" Seminar, 2024
- **Participation Award**, NASA International Space Apps Challenge Hackathon, 2023
- **Participation Award**, Garuda Hacks 5.0 Hackathon, 2024
- **Participation Award**, Line Follower UNJ EOR Competition, 2024
- **Participation Award**, Line Follower UNILA EEA Competition, 2024
- **Participation Award**, MAXY Impact National Hackathon, 2024
- **Score of 945/990**, TOEIC, 2022
- **KKNI Level II Software Engineering**, LSP Certificate of Competence, 2023

ADDITIONAL INFORMATION

Language: English (Proficient), Indonesian (Native).
